

## Lizards

Lizards hatch from eggs. Some are big. Others are little. They can be the size of two men or the size of the tip of your nose. Some can make great pets. Most lizards eat bugs.

Some lizards can swim very fast. These lizards have big, strong tails. They jet through the water.

Many lizards can get up a tree. They have hairs on their feet. These hairs stick to things. They can cling to walls too.

The Basilisk Lizard can run on water. It runs very fast. This lizard has long feet. Its feet keep the lizard up on the water.

Some lizards blend in. They can look like leaves, trees, rocks and sand. They can hide. Where do lizards hide near your home?

## Lizards (Teacher Version)
